FACTSHEET

Reifenhäuser Group at a glance:

Year of foundation:	1911
Employees:	1.500
Production sites:	Troisdorf (Headquarter), Worms, Kabelsketal, Heinsberg, Maize (USA)

The Reifenhäuser Group is a leading supplier of innovative technologies and components for the extrusion of blown films, flat films and nonwovens. Since the early days of the plastics industry in the 1950s, Reifenhäuser has supported countless customers build successful production and become top suppliers to their industry. As a market leader and family-owned company, Reifenhäuser has specialized business units that combine their knowledge in design, process engineering, automation, digitalization, project planning, manufacturing, and logistics. Together, the Reifenhäuser Group forms the world's largest competence network for plastics extrusion technology. Even more than 110 years after its foundation in 1911, the company is 100 percent family-owned.

Reifenhäuser Blown Film: Specialists in blown film technology

With technologies and know-how along the entire value chain, the Reifenhäuser Blown Film business unit supports its customers in the economic production of high-quality blown films that are convincing on the market and ensure business success. Reifenhäuser blown film lines enable producers to face the requirements regarding recyclable products, recycled content and biodegradable plastic products, to gain speed and to use the sustainability change as an opportunity for economic success.

Reifenhäuser Cast Sheet Coating: Modular lines for the production of cast films, sheets, and extrusion coatings

In the Cast Sheet Coating business unit, Reifenhäuser develops and manufactures standardized and tailor-made cast film, sheet and extrusion coating lines, as well as individual components such as coextrusion feedblocks, cast parts, polishing stacks, and winders that perfectly match customer requirements and offer decisive competitive advantages in terms of quality, reliability and cost-effectiveness.

Reifenhäuser Reicofil: specialist for innovative spunbond, meltblown and composite lines

Reifenhäuser Reicofil is a specialist and the world's leading manufacturer of complete spunbond, meltblown and composite lines that enable producers to meet the highest quality demands in hygiene, medicine and filtration. Reicofil accompanies its customers from the planning of the production plant to the commissioning of the line and the further development of the products, thus ensuring unique quality and reliability.

Reifenhäuser Extrusion Systems: Customized components for extrusion and injection moulding

Reifenhäuser Extrusion Systems develops and manufactures tailor-made melt-guiding and forming components for extrusion and injection molding at the price of standard solutions and supports producers in manufacturing top quality efficiently and economically. Customers are guided step-by-step to the ideal component or production is carried out according to specified drawings. The portfolio includes screws, barrels, extruders, coextrusion adapters, flat dies, automation solutions, spinnerets and microcomponents. In addition, Extrusion Systems is a specialist for wear protection: Reifenhäuser Reiloy is the only supplier in the market to develop the corresponding hard alloys completely in-house.
